St. Quentin, France, recaptured by the French Oct. 1, 1918. It was mined, and in parts flooded and burned by the Germans. Every civilian was taken away. A theatre can be seen burning, and at the right is shown the flooded district.

Prof. Thomas G. Masaryk, President of the Czechoslovak Council, possesses the affection and gratitude of his countrymen in a remarkable degree. He is known as "the grand old man" of Bohemia. He has full authority from the Czechoslovak authorities to speak in foreign countries in their name. He is 69 years old.

The picture shows the ingenious "sea tank," Grillo, which, with a companion, entered the harbor of Pola, Austria, on the night of May 14, 1918, and destroyed an Austrian dreadnought of 20,000 tons. The

Grillo was captured, but the other escaped.

The boat is a combination of land tank and torpedo boat. It is especially designed to escape the nets, mines and booms that protect har-

bors. On each side of the boat is a roller that works on the endless chain principle. These are equipped with steel teeth to cut obstructions. What it cannot cut through it climbs over. It carries two torpedoes.

AMERICAN NURSES, ENLISTED FOR SERVICE ON THE WESTERN FRONT, ARRIVING IN ENGLAND.

(© Underwood & Underwood.)

The American forces in France are now close to the 2,000,000 mark, and the Government announced on Oct. 14 that at least 250,000 men with their supplies would be transported overseas every month. It is planned to have approximately 5,000,000 men under arms by July 1, 1919.

To this huge army many elements have contributed, including a large number of colored

soldiers, a regiment of whom is shown in an accompanying picture. In several battles on the western front they have shown excellent fighting quality. Some have been cited for bravery, while others have received the War Cross for gallantry in action.

The women, too, are nobly doing their part. They are serving as nurses close to the front, and the list of those who have been killed and wounded is long and growing.

The horrors of war are not confined simply to the battlelines. The pictures on this and adjoining pages show something of the ghastly ruin that has been left in the wake of the retreating German armies. Attila

once boasted that "the grass never grew where his horse's foot had trodden," and a similar purpose seems to have been held in view during the enforced German evacuation of Northern France.

It is a recognized principle of war that a retreating army is justified in destroying what may be of strictly military advantage to its pursuers. But wanton destruction simply for destruction's sake, has always been held in stern reprobation among

civilized nations. The laying waste of orchards, ruin of private property, deportation of civilians, now being carried out on a gigantic scale, are in contravention of the law of nations, and compensation will be demanded when peace terms are broached.

The cavalry has always been deemed the most dashing arm of the military service. There is something in the thunder of charging hoofs that is calculated to stir the blood, and it has bulked large in the "pomp and circumstance of

glorious war."

At the beginning of the present conflict, both sides counted on extensive use of their mounted forces. In Palestine, Mesopotamia and other outlying parts of the widely flung battle line, this expectation

has been realized, and a great deal of the British success in these regions can be attributed to the work done by the cavalry.

On the Western Front, however, the fighting so soon assumed the nature of trench warfare that the

cavalry regiments have often fought as infantry. Now that the armies are operating in the open, the cavalry has come back into its own, and in the allied advance their mounted troops have rendered gallant and important service.

THE British Admiralty has just made public a list of 150 German U-boat commanders with particulars as to their fate. This list is of necessity incomplete, as many U-boats have been sunk without their identity having been ascertained. Of the 150 named, 32 are listed as being prisoners of war while the others have been killed. Special interest attaches to the fate of Lieut. Capt. Schwieger, who in command of the U-20 sank the Lusitania on May 7, 1915. While in command of the U-88 he was sunk with all of his crew in September, 1917.

## The Home-coming of the Serbian Army

FEW features of the rapidly changing war situation have been more fraught with interest than the return of the Serbian troops to the land they lost to the conquerors in the early stages of the struggle. They had fought gallantly and had badly beaten the Austrian armies who had invaded their mountain strongholds, but the odds proved too heavy when the Germans assumed leadership in the campaign that finally resulted in victory for the Central Powers.

But although their territory was overrun and occupied by the enemy, the spirit of the Serbian troops who had been able to make their escape and join the Allies at Saloniki was still unimpaired, and on many occasions since then they have proved the possession of indomitable fighting qualities. And these have never been more strongly emphasized than in the recent great offensive that has broken the Bulgarian armies and resulted in the recapture of Nish.

It would seem that wounded men, who have risked their lives as the "last full measure of devotion," should be immune from attack by the enemy while their wounds are being dressed. All civilized nations recognize this in principle. But it is

one of the heartrending features of the present war that allied hospitals on land and hospital ships at sea have repeatedly been the victims of attacks by enemy airplanes and submarines. Appalling anguish and loss of life have resulted.

Wherever possible, the Allies have now constructed bomb-proof dressing stations. In many cases, however, this is not practicable, and tragedies such as those mentioned often occur. Representations made to the German Government have

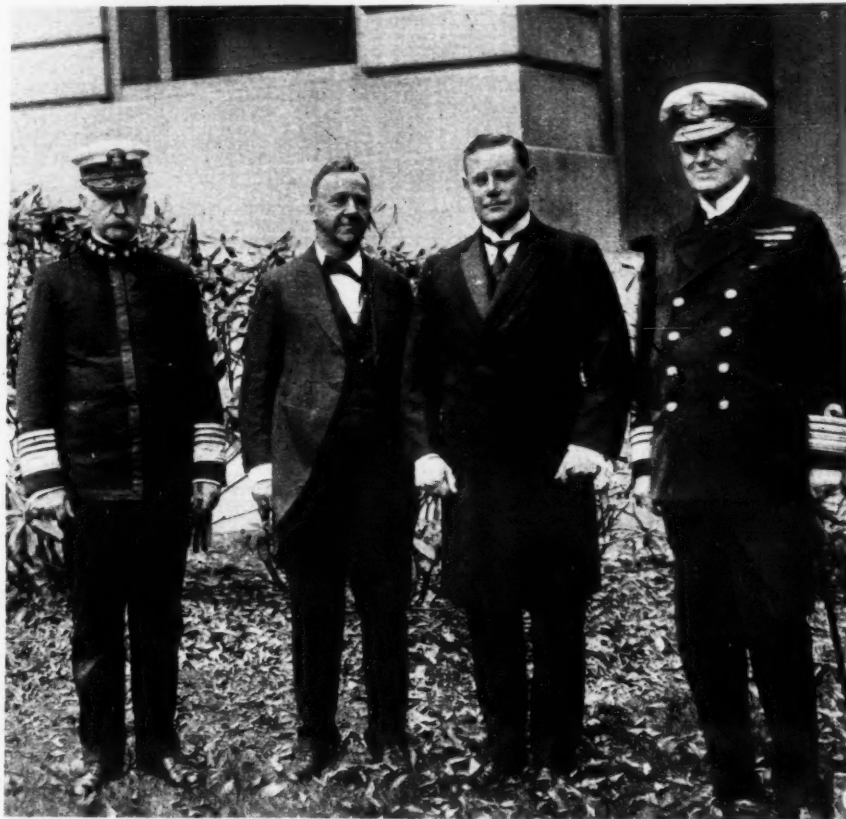

brought forth a disclaimer of deliberate intention to attack hospitals, but the Allies point to the elaborate efforts made to indicate their location by day and night and claim that the attacks cannot be attributed to mistakes.

## A Flashlight on Some Aspects of the War

The above medal is presented to each Jewish recruit in Palestine. It is an ancient Roman medal reversed. The Romans, after conquering the Jews, struck a medal showing Palestine as a woman in chains about to be pierced by the sword of a Roman soldier. On the new medal the symbolism is reversed. The woman's chains are broken and the soldier is running away. The inscription "Judea Delivered" reverses the meaning of the inscription on the Roman medal.

IT was inevitable that the master mind who created The Rivoli and The Rialto should have set the same excelling standards in music and its interpretation as in the distinction of the photo-plays presented.

The music that delights you at The Rivoli and The Rialto is the music of individual artist-soloists of recognized work blending their musicianly talents under the directing baton of famous conductors.

Music Director Hugo Riesenfeld and the conductors of the symphony orchestras of The Rivoli and The Rialto have put the music of these two beautiful homes of entertainment on a par with the other great American orchestras. Discriminating programs, selected from the music libraries of the world, interpreting the composing genius of the ages, make any week a wonder week of

music, as thousands know, to their certain delight, and as you will quickly learn when you, too, form the habit of coming weekly to The Rivoli and The Rialto.

Come to The Rivoli and The Rialto if you enjoy better music and better photo-plays, the photo-plays of Paramount and Arctcraft, presenting "foremost stars, superbly directed, in clean motion pictures."
